

The world's number one source
for SMT production solutions

Discover our highly diverse
professional product portfolio
at affordable prices for any budget

EUROPE SMT

Company Profile

KVMS offers a **complete solution for all of your SMT production needs**. Our warehouse/logistics facility houses hundreds of used and new machines for you to choose from. We have a manufacturing/refurbishment facility responsible for the refurbishing activities of used SMT equipment. KVMS also accommodates customers' requirements in its state-of-the-art 2500 sq. ft. demo room where all of our equipment is available for review and application testing.

KVMS stands for **SMT** equipment, **Software**, **Services** and **Supplies**.

The **SMT Equipment** division offers SMT production solutions to the electronics industry. KVMS supplies both used and new production

equipment and will buy back any surplus equipment from anywhere around the world. This puts us in the perfect position to ensure you can respond quickly to market changes.

When it comes to **Software**, KVMS helps you make a smooth transition whenever you introduce a new machine into your production line, start a new process, or need to execute a New Product Introduction (NPI). Our experts will make sure that your production experiences as little interruption as possible.

Our **Services** department offers maintenance contracts and repair on-site. KVMS engineers are fully trained in all the latest techniques and can pass on their expertise in our own training

facilities. We can meet all of your tape and reel needs at competitive prices. The tape & reel department can meet all of your taping needs. We can do the taping for you, or help you find the right machinery to start your own tape & reel facility.

The KVMS **Supplies** department is specialized in worldwide shipment of all accessories, tools, spare parts and consumables, regardless of the vintage of your machines.

The entire KVMS team will ensure that for every SMT need you may have, we will find the most fitting and practical solution.

Supply & Demand

Supply and demand of high quality pre-owned and new assembly equipment are brought together by KVMS and EUROPE-SMT. Our experts draw from our worldwide network of direct contacts and associates, offering you the widest possible choice at

competitive prices. Our warehouse of over 30,000 sq. ft. contains many machines, feeders and parts (new and pre-owned), immediately available. This enables you to react to market demands in an instant, increasing your competitiveness.

The founders of both KVMS and EUROPE-SMT have been working as SMT specialists in the industry since 1985 and are recognized as being among the most experienced professionals in the business.

What can we do for you

Our staff is at your service with quality advice so you can find the best solution to maximize your investment.

Our financial experts can assist you with financing and leasing solutions. We also offer payback guarantees.

We provide on-site services to help you set up your equipment in the best possible way. Please

have a careful look at our list ("products") outlining which machines and products we service Worldwide.

In our headquarters in Belgium, we are fully equipped to not only simulate your production process, but also to run an actual production test. This means that your machines are ready to go once they arrive at your facility.

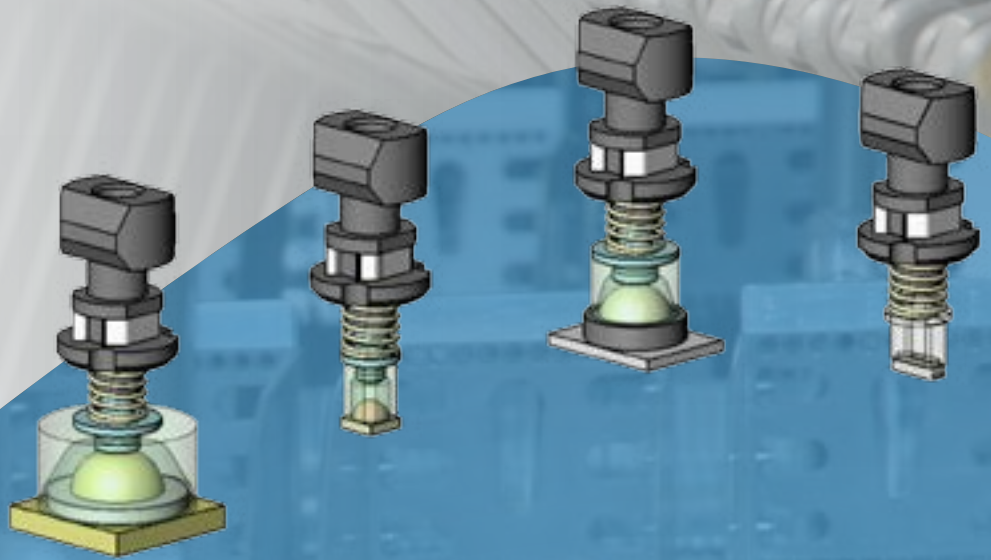

In our 2,500 sq. ft. in-house training center your engineers can receive training on the most recent features of your equipment. Our technicians support the installation of your new equipment on-site at your facilities and will assist you with your first production run at your factory, both in person or through telephone support.

Nozzles

We can supply you all types of nozzles for all brands and for special applications. We can also supply you with customized nozzles for your Assembléon/Yamaha machines. These nozzles will be developed together with Yamaha.

Feedershop

Feeding is an essential backbone of the pick and placement process. With EUROPE-SMT providing not only the best in pre-owned feeders, but also finding that packaging and feeding method that fits your process the best, you can count on a smooth and care-free operating environment guaranteeing the highest machine uptime and the lowest cost of operation. Prevention is always better than

cure. That's why it is particularly wise to make use of our preventative maintenance and calibration services.

The EUROPE-SMT feedershop treats CL, FV, ITF, ITF2, ITF3, TTF and FS2 feeders. Our technicians repair, maintain and calibrate all types of feeders. We offer different contracts and services, giving you the plan tailored to your needs.

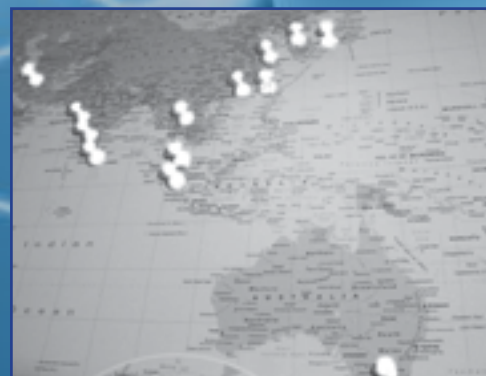

You can also buy feeders second-hand that have been repaired, maintained and calibrated by our technicians and engineers.

We test each feeder with our analyzing and calibration tools, and ensure that your feeders arrive at your facility in excellent condition.

If you have any questions about our different services you can contact us at info@europe-smt.com.
